

Ooh... So ya are another one they sent to tell me they don't have to pay for my merchandise. How can these people be so dumb they don't understand a concept so simple as pay for what ya have bought?

About This Game

Coffee Shop Tycoon is a management game in which you take control of your own coffee shop. Will you thrive and become a popular coffee shop or die trying? Everything lies in your hands.

The game is NOT another 'click and wait three hours for your employees to cook' kind of game you will have to take choices constantly that will bring more costumers or make you lose money. We are building a game in which customization and planning is as important as having fun.

Coffee Shop Tycoon features:

- Brew your coffee
- Create your own drinks

-
- Hiring and Training Staff
 - Marketing Campaigns
 - Seasons and Trends
 - Several coffee shops with different styles
 - Build reputation with Gourmet beverages and special coffee beans
 - Choose your coffee shop logo and color
 - Buy furniture and decoration for your coffee shop
 - Add services to your coffee shop (Wifi, Rewards, and more)
 - Special Events
 - Resupply food and drinks
 - Manage your franchise from you Headquarters.

you are not a player in this match. 10/10 esea. What a game! It's perfect, I'll gladly recommend it.. very intersting mod, pls add French army. In my opinion this is extremely over price.

Downside:

- Constant pop ups everytime i went to another section.
- Confusing if you have never play this game before trying to find your way around the UI.
- getting a warning email, making the correct change but still getting the same email over and over again?
- compared to other sport management games very poor.
- Championship manager 2010 (diff sport i know) is a much better game all round, and thats from 5/6 years ago?!
- Extremely over priced.

Goodpoints?!

- if your looking for a rugby leage sim, perfect.
- . This game is too simple for my taste, but if you like simple games this might be a game for you.

You only get 2 units types: Land and Sea

Land units can only move to adjacent land area or board a sea units for a ratio of 1 to 1 to move to any coastal area.

You can only produce units in you zone with factories and it's not possible to build of capture more factories. If you lose all you factories you cannot produce any more units.

You receive a set amount of pounds per provinces to spend once a year and you can only spend you money on that turn. There's 4 turns per year, one for each seasons. You do not need to maintain you army so it's possible to build up an insane amount of troop which some time you need. With your money you can train troops, build forts and do 2 kind of 'political' actions.

To goal of the game is to get a set amount of victory points by capturing zones. Each zones is worth a random number of VP and revenu.

I've seen a couple of weird thing, like small neutral provinces with more troop then any super power. Panama had over 30k troops. If you own most of the map (90%+) you can build about 2k troops per year (unless you are Russia which build troops for half the prince of the other nations). So controling the world it would take you about 15 years to just match the force of a minor neutral nation and that would not even be enough to scratch their defence. That pretty much was a buzz kill for me.

You can also kill one by one the troop in neutral countries as a political action for the price of training 2.5 troops (5 for Russia) which make this action mostly useless. You can also give them money so they can buy troops to make it harder for other nations or you could buy the troop for you to conquer more land and get more money for more troop... so yet an other pointless action.

An other point is there is no real political mechanic in the game everyone is at war and that is it.

On a final note the AI is just horrible, play on hard if you want at least a tiny challenge.. Well the game looked like a good management game about the survival of a little girl, but the truth is that the game is just a clicker and in the most boring way =(Sad. i love boobies. It's like GNOG but not so intuitive and weird. I found the game to be boring and lack the in depth feeling you get with a good DM in a tabletop game. It is postive that it tries to be a roleplaying game but it just misses the mark a little.

yiiiikes..... Great game. I had a serious bug in that my computer was too good for it so you have to slow your comp down to make it run good, found that on their forums or I would have never guessed that, but I'm glad I did. Graphics not so special lol but it's a great fantasy strategy game.. To properly review this game, we have to travel back in time a little...

Welcome back to 2007, where the most popular game on Steam is Counter-Strike Source, where your game time isn't tracked, where badges & cards don't exist. It's also where, hiding in the deepest, darkest corners, indie devs pushed out games on Steam without Early Access.

I like to call this epoch "The Dark Age of Indie Gaming on Steam". Irony since it's in this epoch indie gaming boomed to-the-max. Dark, obscure titles were pushed out on Steam which made Ricochet look cool.

Enter Vigil:Blood Bitterness, a game I bought July 2nd 2007 for 2,49USD during a "normal" sale, y'know, not like the ones we have today. This game is a point & click "adventure"... erm... not even sure what to call it. All I remember was walking a few screens away from the starting point and not being able to progress further. If I recall right, it had something to do with the screen resolution ratio or whatnot. I clicked everywhere on the screen and pushed all my keyboard buttons. Nothing worked and I just kept dying out of nowhere while this spooky volume-increasing music played in the background.

The art style is the reason I bought this game, nothing else. I thought "hey, this black & white thing looks kinda cool, imma give it a try". Even 11 years later, I still regret this decision and I still think about it sometimes like it's some sort of cursed game or something. I won't ever know what this game was about, how it ends or what's in between. Maybe it's best I never know...

Today, you cannot boot this game since it was coded to be used with Windows XP and lower. The software used by the devs could only be used for a limited amount of time and since then, the software was updated, making it so updating the old game could not be possible. This game, these ideas, are lost forever in a digital abyss, a perpetual limbo of obsolescence.

Cannot recommend since it's broken and outdated. I rate this game ##ERROR## out of 10.

Rest in peace.. Needed some tricks to work on a dual screen setup, see the Steam forums for a solution. The controls (I've tested with both kb+mouse and a joypad) are quite unintuitive no matter how I set them up. Also the voice acting is mostly annoying, but the game looks really good and who wouldn't love the steampunk setting.

Still, unfortunately in terms of playability, there are a lot of arcade shooters out there which are better.. Not only is this not endless, it clearly has timed objectives and an end.. Probably the best VR storytelling experience I've seen yet - well worth the \$6 for about 40 mins of storytelling. Full immersive 3D.. 10/10 I would buy the game, pirate it and sell it again. But really there is a cracked version on the ocean of games you might as well download that tbh it has achievements built in too in the ocean of games thing. Very good game, has a good story and so much to do once completed. Only problem would be the amount of glitches and bugs the game has. Would have to restart the game just to be able to fight someone.. Halliauegiuah **THIS GAME IS AWESOME!!!!!!!!!!!!!!!!!!!!!!**. This is a challenging climbing game. You will really have to plan your movements out to get to various locations. Game does need a better tutorial. I got stuck on a particular location and have no idea how to get across. Still, this is a nice challenging game. Sets itself apart from other climbing games by being much cheaper.

Sale Price Rating 6/10
